PROFESSIONAL SUMMARY

MBA Business Analytics candidate with hands-on experience in **CRM operations, sales pipeline management, data analysis, Power BI, SQL, Excel, and workflow automation**. Skilled in transforming business requirements and raw data into **actionable insights, interactive dashboards, and automated business solutions**. Combines business understanding with technical problem-solving to support **data-driven decision-making, process optimization, and business intelligence initiatives**.

EDUCATION

MBA – Business Analytics

2025–2027

Parul University, Gujarat

Bachelor of Commerce (B.Com)

2022–2025

Maharaja Sayajirao University, Gujarat

EXPERIENCE

BDA Intern – CRM Software

45-Day Internship

Knowledge Square LLP

- Managed **sales workflows, lead pipelines, and follow-up activities** within DIGIESALE CRM to improve lead visibility and sales process organization.
- Analyzed prospect requirements and customer pain points to conduct **personalized outreach through LinkedIn and WhatsApp**.
- Coordinated **live product demonstrations**, supporting prospect engagement and communication throughout the sales cycle.
- Created and managed **WhatsApp Business API (WABA) templates** for structured bulk communication and outreach campaigns.
- Used **AI tools and workflow-based scheduling** to create and publish marketing content across social media platforms.

PROJECTS & ANALYTICAL WORK

Alpha AI – Telegram Food Ordering & Hotel Assistant (@AlphaGen_1bot)

N8N | Telegram Bot API | Google Sheets | AI | REST APIs

N8N

- Built an AI-powered conversational assistant that manages **menu discovery, inventory availability, FAQs, customer orders, pricing, and order status** through Telegram.
- Integrated **N8N, Telegram Bot API, and Google Sheets** to create a real-time workflow for inventory and order management.
- Automated **order capture, total calculation, confirmation, and status retrieval**, reducing manual handling of routine customer interactions.
- Designed modular workflows using **webhooks and REST APIs** for maintainability, scalability, and integration with additional business services.

Power BI Business Intelligence Dashboard

Power BI | Power Query | DAX | Data Modeling | Data Visualization

Power BI

- Transformed and cleaned raw business data using **Power Query** and developed a structured data model for analytical reporting.
- Developed **DAX measures and calculated metrics** to evaluate revenue, profit, growth, KPIs, and business performance.
- Designed an interactive dashboard with **KPI cards, trend analysis, category analysis, and drill-down reporting**.
- Converted raw datasets into actionable business insights by identifying **performance trends, patterns, gaps, and opportunities**.

Advanced Excel Analytical Dashboard

Microsoft Excel | Pivot Tables | XLOOKUP | VLOOKUP

Excel

- Developed an interactive Excel dashboard using **Pivot Tables, lookup functions, data summarization, and visual reporting**.
- Analyzed departmental and category-level performance to identify **business trends and performance patterns**.
